Academic Integrity Declaration

Student Information
- **Full Name:** ALI SALAHELDIN KHAMIS ALI
- **Registration Number:** 25/26883
- **Course:** SWE 3513 Artificial Intelligence
- **Assignment:** Individual Assignment 2 - Musanze Harvest Intelligence Service
- **Verification Code:** AI-A2-6883

Declaration

I, ALI SALAHELDIN, registration number 25/26883, hereby declare that:

1. **Individual Work:** This submission is entirely my own work, completed individually as required by the assignment specification.

2. **No Unauthorized Collaboration:** I have not collaborated with any other student on this assignment. All code, analysis, and documentation are my own.

3. **AI Tool Disclosure:** I used AI coding assistants Nemotron 3 as a development tool for:
- Project scaffolding and file structure
- Code implementation guidance
- Documentation drafting

All AI-generated code has been reviewed, understood, and tested by me. I can explain and modify any part of the implementation.

4. **Dataset Authenticity:** The dataset was generated using my personal seed (LLLL=6883) as specified. The SHA-256 fingerprint in `artifacts/data_fingerprint.txt` matches the output of `run_all.py` with my seed.

5. **Original Analysis:** All model interpretations, error analyses, cluster profiles, and justifications in the technical report are my own original writing based on the results produced by my code.

6. **No Plagiarism:** I have not copied code, text, or results from any other student, online source, or previous submission.

7. **Reproducibility:** The submitted code can be run from scratch using the commands in README.md and will reproduce the exact same dataset, metrics, and artifacts.

Commitment

I understand that:
- Submissions with mismatched seeds, copied fingerprints, identical explanations, or unexplained model code may be referred for academic integrity review.
- The assessor may ask me to explain and make live modifications to my code.

- The Moodle timestamp is authoritative for the deadline.

Signature
